

Scale Drawing Challenge

Mary, Star of the Sea School · 7th Grade Math · Dr. Park

Name: _____ Date: _____ Class: _____

SCALE: 1 in on the original = 4 in on your paper → Ratio 1 : 4

Instructions

1. Label your grids. Columns A–D across the top, rows 1–4 down the side (already labeled).
2. Copy one square at a time. Look only at the lines inside one small square. Copy them into the matching big square — same relative position, angles, and curves.
3. Do NOT draw the whole picture at once. Square-by-square accuracy makes the whole picture look right.
4. When finished, erase the grid lines and color your drawing.

1. The Original Drawing (2" × 2", 1/4-inch grid)

2. Predict — before you draw

If every side is 4× longer, the AREA becomes _____ × bigger. (Hint: $4^2 =$ _____)

If the original small square is 1/4 in per side (1/16 sq in), each big square is _____ in per side and _____ sq in in area.

Your Big Version

Name: _____ Class: _____

Scale 1 : 4

	A	B	C	D	E	F	G	H
1								
2								
3								
4								
5								
6								
7								
8								

1. Scale as a ratio: _____ : _____

2. 1 in on original → _____ in on yours (linear factor)

3. 1 sq in on original → _____ sq in on yours

4. Why does the grid method keep proportions? (1 sentence)
