

Math 6 — Course Syllabus

Mary, Star of the Sea School · SY 2026-2027

Mary, Star of the Sea School Mission

Nurture, Unite, Inspire. We are committed to nurturing each child's curiosity, uniting our classroom in respect and collaboration, and inspiring every student to grow in knowledge, faith, and wonder for the world around them.

Course Description

Math 6 is where math becomes a real scientific tool. Across four quarter themes — Lab Math & Density, Numbers at Universe Scale, Reading the Earth, and Climate Data & Geometry — you will use the same math that scientists use in real labs, on real Hawaiian trails, and in real climate data. Each quarter is paced so the math lands exactly when STEM (science) class needs it. Expect a mix of hands-on labs, small-group problem-solving, focused practice, math games, and project-based assessments.

Textbook: Glencoe Math Volume 1 and 2

Teacher

Dr. Peter Park

Email: ppark@starofthesea.org

Phone: (808) 228-2285

Parents may email me or leave a message with the school. I respond within 24 hours.

Materials

- Composition notebook
 - Pencils, erasers, highlighters
 - Notebook paper
 - Calculator
 - Folder for handouts
 - Textbook (Glencoe Math Volume 1 and 2)
-

Grading Policy

20%	25%	30%	25%
Participation	Tests	Homework	Quizzes
Composition books, notes, in-class behavior, supplies	Q&A, written essay (1 per chapter, 20 pts)	Assignments, classwork, class prep, projects	2 per chapter, 5 pts each

Make-ups: Students who score below 80% on tests may make corrections or retest to improve their grade.

Late work: Homework is due the next class meeting. Late work earns a maximum of 50% credit; if not turned in after two class meetings, the grade is a zero.

Course Outline by Quarter — Math 6

Q1 — Lab Math & Density

- Lab Math Foundation: Decimal Ops, Unit Conversions (KHDUdcm), Scientific Notation, Percent Error
- Factors & Multiples; Fraction Division
- Density (m/V) — lands by mid-September for STEM Density Lab

Q2 — Numbers at Universe Scale

- Ratios & Rates; Percents
- Powers of 10 / scale of the universe (deep dive)
- Integers; Coordinate Plane

Q3 — Reading the Earth

- Topographic Maps & Slope; Plate Tectonics & Rates
- Richter Scale & Powers of 10; Radioactive Decay & Half-Life
- Algebraic Expressions; Equations
- Percent Composition refresher — for the Great Oxygenation Lab (% O₂ in the atmosphere over time)

Q4 — Climate Data & Geometry

- Statistics & Data Analysis (climate datasets, %-change in CO₂)
- Inequalities; Variables & Relationships
- Area, Surface Area, Volume; Word Problems capstone

Student & Parent Communication

Beehively is the platform where students and parents can regularly check grade progress and receive notifications of missing or incomplete assignments.

Parents are contacted by email up to two times if their child is receiving a deficiency, plus standard email notifications. Students are always informed of any grade that is a C or lower and ultimately are responsible for their grades.

Student work is updated regularly.

Middle School Math Goal

From 6th through 8th grade, we focus on more than just numbers — we work to build strong math skills, boost confidence, and develop critical problem-solving abilities that students can apply in every subject and in everyday life. Our approach combines hands-on activities, real-world applications, and a supportive learning environment where students feel encouraged to take risks, ask questions, and think creatively.

By the time they graduate, our students are not only ready for Algebra and beyond, but they also possess the perseverance, analytical thinking, and resourcefulness they need to thrive in high school and in life.
