

Math 7 — Q1 Mid-Quarter Test

Mid-Q1 Content · 15 questions

Name: _____ Class: _____ Date: _____

Directions: Show all work. Box or circle your final answer. Include units where appropriate. No calculators for Q9–15.

Metric Conversion Reference — KHDUdcm

Kilo	Hecto	Deca	Unit (m/g/L)	deci	centi	milli
k	h	da	m (meter) / g (gram) / L (Liter)	d	c	m

Going **UP** the ladder (smaller → larger unit): move decimal **LEFT** one place per step. Going **DOWN** (larger → smaller): move decimal **RIGHT** one place per step.

- Convert 4.2 km to millimeters. Answer: _____
- Convert 250 mg to grams. Answer: _____
- Convert 0.85 L to milliliters. Answer: _____
- Convert 7500 cm to kilometers. Answer: _____
- Convert 2.5 kg to milligrams. Answer: _____
- A student measured 48.5 g; actual mass is 50 g. What is the percent error? Answer: _____
- A student measured a length as 25.5 cm; actual length is 25.0 cm. Percent error? Answer: _____
- A blue whale weighs 180,000 kg (actual). A scientist measured it as 175,000 kg — an error of 5,000 kg. A house cat weighs 8 kg (actual). Another scientist measured it as 7 kg — an error of 1 kg. Which measurement is MORE accurate? Answer: _____
- Compute: $-11 + (-7)$. Answer: _____
- Compute: $15 - (-4)$. Answer: _____
- Compute: $(-6) \times (-5)$. Answer: _____
- Compute: $(-48) \div 8$. Answer: _____
- Simplify (order of operations): $3 - 5 \cdot (-2)$. Answer: _____
- Compute: $-8 - 6$. Answer: _____
- Compute: $12 \cdot (-3)$. Answer: _____
